Solidarity and Social cohesion: Our common challenge

Offering a better quality of life to all the inhabitants of isolated rural towns and regions including people in difficulty while reducing the environmental impact is a current challenge shared by the Kingdom of Morocco.

Extreme poverty, the increase of children and young people in difficulty, at risk, social disruption, the arrival of refugees, the destruction of our environment lead to a community action of proximity.

Collaboration and Presence in Morocco

AL YASSAMINE works with partner organizations and the Moroccan authorities to this common challenge.

AL YASSAMINE integrates any public regardless of age of income or disability by the implementation of projects aimed at strengthening their dignity, their resilience and their social and professional inclusion.

For Social Solidarity Sustainable Development and the Environment

Extent of work

Community outreach action

Serve those who have never had the opportunity to be supported and strengthen the consideration of the dimension of sustainable development and the environment in the management planning of municipalities and regions of Morocco is the objective of AL YASSAMINE.

For example, AL YASSAMINE is committed to:

- Reaching the most disadvantaged, including isolated populations, through infrastructure rehabilitation, literacy and awareness projects, training and income-generating activities, organization of events, medical caravans, ..
- Facilitate social cohesion through projects of social integration, access to education and culture for all audiences, regardless of age, income, origin or disability.
- Protect the environment through local community actions and the proper management of natural resources.
- To emergency, humanitarian and sustainable development solidarity according to local, regional and national priorities.

Impact in the Kingdom of Morocco: The Province of Taroudant

Meeting the current challenges

Joining the country's reform projects and monitoring the profound changes in the decentralization system as a framework for strengthening local democracy and the exercise of good governance.

Indeed, the eradication of poverty, access to education and care for all the population, the creation of jobs in the municipalities is a challenge that municipalities and regions are called upon to meet.

Aware of this situation, AL YASSAMINE and its partners offer a dynamic of global development through education, training and awareness actions and support Moroccan localities in the planning and management of their sustainable development activities for the benefit of all.

The support is translated by the revitalization of AL YASSAMINE to which tools are brought for the implementation of the sustainable development dimension of localities in priority in isolated rural villages in the Atlas regions where the effects of poverty are no longer feel.

This assistance enables the association to build the capacity of all to participate in economic, social and cultural life in a healthy environment.

Social and professional integration for all, the rehabilitation of infrastructures and the protection of the environment are essential conditions for objective 11 of the Sustainable Development Goals.

*Dynamic, healthy and sustainable cities and communities ...
where it is good to live together.*
